

I do not think that I am being served by the local television KMWB channel 23. They are going to air some anti-Kerry propaganda without offering equal time to the other side. So, basically it's like Berlusconi in Italy: they're using their control over media to manipulate the minds of people in the electorate and sway the election.

As I recall, the use of the airwaves is a gift from us, the people (we own the airwaves!), to media companies and when they don't use them properly or actively mis-use them then we can take the airwaves back from them and give them to some one else that will use them properly. If KMWB channel 23 (and Sinclair their parent company who I understand is forcing local stations all over the country to air the biased and unbalanced programming) commits the act of not offering equal airtime to the different sides in the election then I would ask that you pull their license and we get a new station on their old spot on the dial.

Yours,
Christopher Loch
